PAVING TILE

ACCESSORIES

SCG Geotextile

Separation and Reinforcement of Floor Subbase

Separating the subbase layers from the native sub-grade layer has been proven to be an effective method. Use of geotextiles improves the engineering behavior of roads and runways while fulfilling the following functions :

- Preventing pumping of fines from the subgrade to the base course.
- Maintaining planned base thickness and preventing loss of added material to soft soil.
- Distributing vertical forces over a large area.
- Using geotextiles in the road cross section prevents differential settlement, making it possible to reduce subgrade thickness where necessary.

Dimension

Size : 2 x 4 m
Weight : 1 kg/pack
Usage : 8 sq m/pack

SCG Solvent Coating

A glossy acrylic solvent based top coat for stone and other masonry surfaces

It has superior durability, high gloss retention and weather resistance that provides water repellant properties. SCG solvent coating is suitable for interior and exterior application, ideal for slate, flagstone stamped, natural stone, architectural stone, concrete imprint, texture coating & etc.

*** Not recommended for pre-sealed surfaces or non-porous surfaces such as ceramic tile, marble, granite, porcelain and terrazzo

Dimension

Size : 3.4 Liter Coverage : 12 sq m
Size : 18 Liter Coverage : 63 sq m

3.4 Liter

18 Liter

Jointing Sand Coating

Tighten the sand between the paving block and make its surface easier to clean

Jointing Sand Coating is a coating for hardening the sand between blocks and for Anti-dirt coating. It helps paving block easier to clean and maintenance. It also used to resist weed growth around paving block gap.

* Approximately usage advised as above which depending on sand thickness and brick sizes

*Mixture proportion 1:2 (Jointing Sand Coating : Water)

** Should be use it all within 2 hours after opening.

INSTALLATION
Guideline

Installation

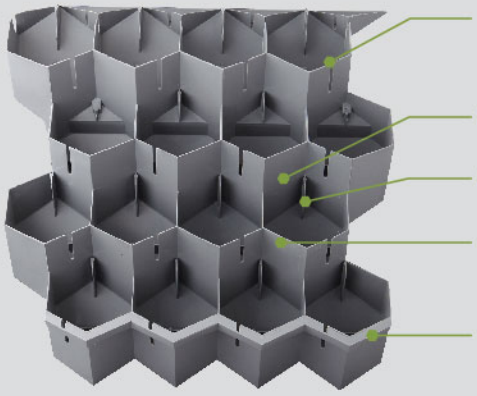

1. Install the foundation pillar
2. Pour concrete for foundation footing size 0.30 x 0.30 x 0.45 m
3. Place a concrete beam
4. Install Castle Stone or Smooth Column
5. Install Castle Stone Stone or Smooth (The level of first tier should be adjusted by Mortar)
6. Install Castle Stone Stone or Smooth Coping

** Warning : Installation area and structure need to be approved by engineer and architect.*

MODULAR Green Hive

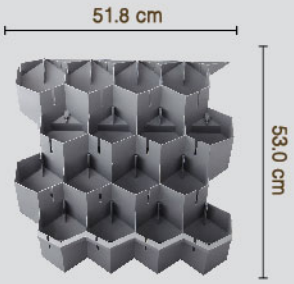

The ultimate innovation of vertical garden for unboundedly green living.

5 Reasons for Using Modular Green Hive

1. Hive-shaped pot and overflow outlet to help water circulate thoroughly.
2. Water retaining system for backup to water your plants.
3. Lock system to prevent the pot from falling.
4. Made from HDPE plastic, UV resistant, lightweight, and safe for building structure.
5. Quick to install and easy to maintain.

Water Absorption Mechanism of Plants

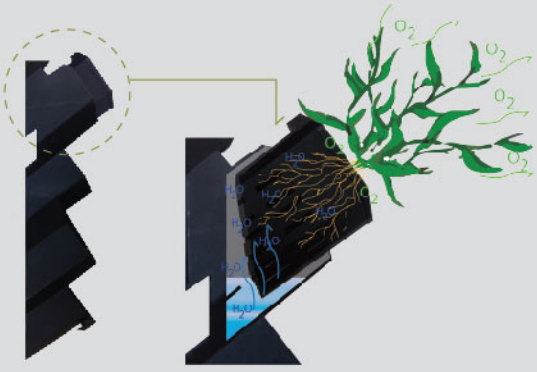

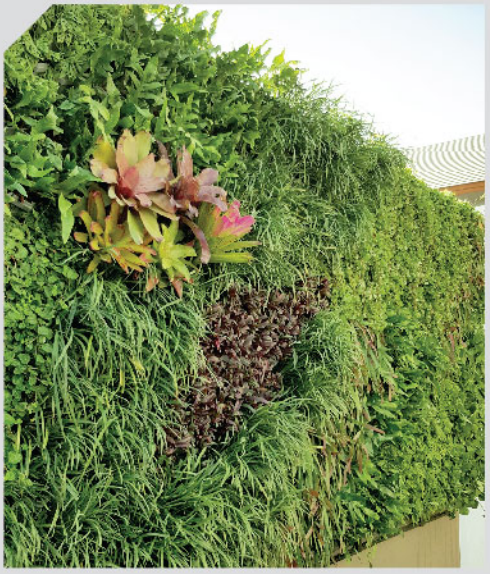

Image showing water absorption of plants

The modular green hive pot is designed to has special angle that let plant roots absorb the water in the slot.

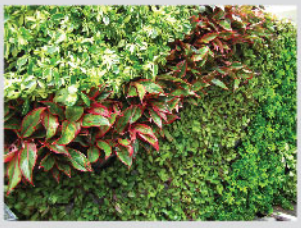

Product Specification

Dimension : 51.8 x 53 x 11.6 cm Usage : 4 pcs/sq m Weight : 2.5 kg/set

Modular Green Hive System

Plant

Plants for a vertical garden are important. As such, SCG has teams of researchers, horticulturists, and designers to help you select plants and design a beautiful plant arrangement for your space.

Structure Frame

The frame is made from carbon steel coated with high quality anti-corrosive paint. It is designed to suit various types of walls and able to support the weight of planting pots, rainwater, and wind load while taking into consideration safety and damage of the building structure.

Irrigation System

An automated irrigation system makes it easy to maintain your garden. It controls watering efficiently and saves water, time, and money for maintenance.

Irrigation Equipment

DIY Package

“ *Create your own vertical garden* ”

A vertical garden package comes with installation equipment for you to easily build your own vertical garden. Even a small area can be limitlessly transformed into a green space.

One Package of Modular Green Hive Consists of

Modular Green Hive Unit : 1 pc

+

Modular Green Hive Pot : 16 pcs

+

Modular Green Hive Hanging Bar : 1 pc

+

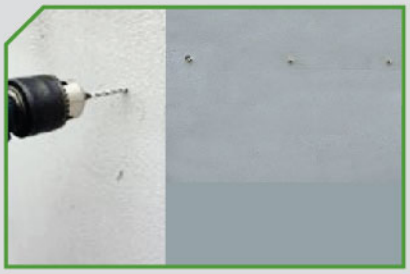

Screw anchor bolt : 3 pcs

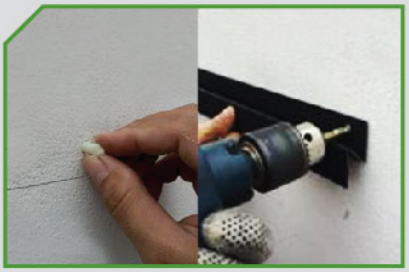

Steps to Installing Modular Green Hive : DIY Package

1. Determine the desired level. Use the hanging bar to mark spots.

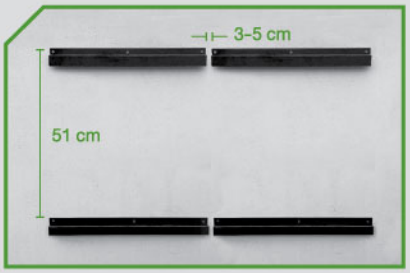

2. Use a 5-mm drill bit to drill holes at the three marked spots.

3. Insert the anchor bolts and screws into the holes to install the hanging bar.

4. Hang Modular Green Hive for your plants.

5. - If you want to install 2 vertical sets of Modular Green Hive, the interval between hanging bars should be 51 cm apart.

   - If you want to install 2 parallel sets of Modular Green Hive, the interval between hanging bars should be 3-5 cm apart.

Fulfill natural feeling and green space easily by yourself.
